ENTER A NEW GENERATION

A Brand New 'HIGH-VALUE' ENERMAX Power Series

City of Industry, CA – February 4, 2011

ENERMAX is proud to present a brand new power supply series, NAXN, which is ideally for both mainstream desktop PCs and advanced multiple GPU gaming systems with up to 80PLUS Bronze efficiency level.

NAXN is ENERMAX's high-value product line. It impresses users with high quality and full power performance with less stress on the pockets.

750W model is with 80PLUS Bronze certification and modular cables design.

The series are **DXXI ready!** Development of ever better performing graphic cards will achieve a new level in 2011 with upcoming models, which require two 8P PCI-E connectors per card. For gamers want to be ready for these cards, better to have PSU with 100% 6+2P (8P) PCI-E!

350 to 600W models are with standard cable design and ErP Lot 6 2010 ready!

With all new high efficiency 5Vsb design, the series will help the computer system consumes less than 1W power with ErP Lot 6 enabled motherboard, saving 75~85% energy in comparison with traditional non-ErP Lot 6 system in standby mode.
